Palate The wine is well rounded with crisp and crunchy stone fruit flavours. It shows well balanced natural acidity and leans towards elegance.

Winemaking Fruit harvested in the cool of the night then transported quickly to the winery. It is passed through the crusher, then transferred into the press. After a gentle pressing, the juice is allowed to settle before racking to achieve the desired level of solids in the juice. The wine is allowed to mature in stainless steel tanks before cold stabilisation and bottling.
